

Measuring and monitoring of specific parameters within hydraulic driving systems

Components

- ⇒ Pump group Rexroth - ABSKG 40-AL9/VG2-004/90L
- ⇒ Manual equipment for pressure testing of hydrostatic components
- ⇒ Absolute pressure transducer, 500 bar (HBM)
- ⇒ Acquisition system NI USB-6218 (National Instruments)
- ⇒ Portable system for fluids state parameters measuring
- ⇒ Digital flow-meter with 6 prize
- ⇒ System for evaluation of the fluids compressibility (max. press. 100 bar)
- ⇒ System for evaluation of the fluids compressibility (max. press. 400 bar)
- ⇒ Höppler Viscosity meter, with thermometers and calibers set with different diameters and materials
